

With over 20 years of experience in earthquake engineering, Hing-Ho Tsang is a Chartered Professional Engineer and serves in advisory roles to governments, industry and professional bodies, developing seismic design codes and guidelines for various countries. He has been a specialist consultant for building and infrastructure projects nationally and internationally. He has published over 200 research articles and his research works have been recognised by a dozen international awards and university prizes or fellowships. He is ranked in the Top 1% of Scientists in the World for Career-long Impact in Civil Engineering by Stanford University. He is Australia's National Delegate to the International Association for Earthquake Engineering.
